Superintendent Rural Common Boards Central

Proceedings to be dated the "13" day

The Mayor & Council having
visited & in company with
the President of the
Municipal Court the
principal source of
the water supply of
the Talbot & Canton
ment has given
verbal orders for the
~~deep deepening and~~
deepening and improve-
ment of all existing wells
where they may be
necessary. Mr Dalrymple
has also approved the
measures already taken
by the Municipality

for the limitation of
the supply to each
family to its ordinary
domestic wants, and
further request that
a careful gauge may
be made of a few
of the principal wells
in each locality, each
week, every Saturday,
and submitted for
his information, in order
that he may be kept
aware how the supply
is being maintained.

The President Sir. C.
has already been requested
to bore in any suitable
localities for the purpose
of ascertaining whether it
would be feasible to

I wish every water
to increase the capacity
supply wherever it is
to fall short of the
demands upon it, and

Sir,

I have the honour to acknowledge receipt of your No 8404/1921 of the 1st instant and in reply to state for the information of the Chief Commissioner that I am to forward herewith Declaration Forms, Nos 56,507 to 508 issued under the Little Aluminium Scheme, last three weeks, the value of these will be added to the Account rendered by this Department and to ask that in future your Indents under

deserted and the tank still contains sufficient water for the present use. A pump was attached to the tank on the south side of the road from the Eastern Division covered with sufficient tank to a depth of 18 feet. As soon as the tank dries up and is not required for Locomotive Watering the tank and the pump will be removed from the premises.

Until the Locomotive Superintendent can report on the matter, steps will be taken to have the tank filled with water from the Reservoir near the Station and the pump will be removed when no longer required.

current of water. The investigation of which has also been Commenced Departmentally in some low ground immediately to the East of Cleveland Town Police Station and in which locality there is reason to believe that water of good quality will be found at no great depth. I have only to add that where the depth of water would admit if this being done all the public wells have been cleared of silt and all other impure matters.

I avail myself of this opportunity to point out that it seems highly desirable that advantage should be taken of the present exceptional season to effect a thorough clearance and deepening of all the tanks connected with the general water Supply of Bangalore. There are particulars refer to - No 2 Reservoir (Hollen Tank) No 6 Shoolay

No 927/3 of 1/4 March 1915

Dated the 3rd from President Municipal Commission.

In reading under date 13th January No 779/1574 the President Municipal Commission was requested to keep the officiating Chief Commissioner exactly informed of the condition of the water supply in the Pettah and Cantonment, by the submission of weekly statements showing the depth of water in the principal wells in each locality, and to report what results had attended the endeavours to purify the supplies in such wells, & it is now

to

the department. The state-
ments have now duly
submitted and the fore-
going letter & Govt Answer
reply to the 6th resolution.
2. We have learn that during
the past year the water in the wells which
are most frequented in
each District has not
diminished to any very
serious extent, and though
the Official reports that
the public wells in the Gen-
al Bazaar Division (No 4,
are generally beginning to
fail, ~~it appears from~~ the
the figures entered in
statement for the week ending
9th Instant, show that the supply
in the wells No 36 and 40
situate one in the Vernacular
Cutcherry and the other
at the N.E of No. 4 Bazar
-aar) which seem to be

the most important in the Division. Though the water is rather inferior in quality and only fallen during the period in question, from 11 ft. 6 to 8 ft. 6 and June 8 ft. 3 to 6 ft. 6.

3. In order to supplement deficiencies, the Municipality have sunk several new wells with fair results, and two private individuals have also undertaken to do so at their own expenses — Mr. Ramalingam at the junction of the Broadway and Sinnmalai Road, and Contractor Kuddapah at the Police Station in Chaulard Town. The Resident will be good enough to intimate to

Three heroes, that the
municipality should be highly appreciated by the Officiating Chief Commissioner

In the endeavour to give effect to the suggestions that advantage be taken of the present season to deepen the beds of the tanks connected with the town-water-supply, and solicits a special grant of Rs 10,000 for this purpose The existing Chief Commissioner will be glad to consider any estimates for these works which the Executive may desire to submit, and in the meantime will make a grant of Rs 5,000 to be debited to the Provincial Public Works Budget, to be expended

expended during the present month at the Presidents' discretion as it is decidedly desirable to provide suitable work for those of the unemployed who are already beginning to feel the pressure of the present high prices.

5 In future weekly statements it will be sufficient to include three or four of the principal works in each Division, and at least four in different parts of the Parish should be added to the list in the original order included both Pollok and Pauntonmuck.
